

THE DEPLOYABLE SOLAR PLATFORM

Power. Deployed. Anywhere.

A containerized, rapidly deployable solar energy system.
Operational within hours. Ready for the field.

134 kWp

POWER OUTPUT

200 PV panels

8 h

INITIAL DEPLOYMENT

4 persons

25 min

RE-DEPLOYMENT

automated / remote

20 ft HC

CONTAINER

~14 t · ISO logistics

WHY NOW

The energy market is shifting.

01 Diesel pressure

Rising fuel costs and vulnerable logistics

02 Grid resilience

Climate, cyber and geopolitical risk

03 Off-grid growth

Remote demand growing at ~15% CAGR through 2040

04 Rapid change

Rapid deployment for temporary infrastructure

MOBILE SOLAR DESIGNED FOR REAL DEPLOYMENT

Faster. Safer. Re-deployable.

AUTOMATED OPERATION

Smart, app-controlled, wind-safe

- Handheld remote and mobile app
- Auto-retract at wind threshold
- Minimal operator dependency

HYBRID-READY ARCHITECTURE

Plug into any energy mix

- BESS battery storage compatible
- Works with diesel gensets
- Modular and scalable — add as you grow

ACROSS KEY INDUSTRIES

ECONOMICS · LCOE USD / KWH

Typical off-grid hybrid project economics — depending on irradiation, logistics and diesel costs.

ENVIRONMENTAL IMPACT · PER UNIT / YR

From a single container to a global energy platform.
